Site Audit

Project: infolinkplus.wordpress.com
Website URL: infolinkplus.wordpress.com
Date: Aug 1, 2022 (19:45:30) Edit Schedule

Hello,
Here is the update for your Site Audit campaign.
We haven't detected any significant changes in your site's health since the previous audit.

We encourage you to fix all issues to win Google's favor and power up your ranking potential.

Tip of the week

We crawled only 43 out of 170 pages submitted in your sitemap.xml.
If the number of pages specified in your sitemap.xml doesn't match the number of crawled pages, this may be a sign that your website has a bad crawlability due to poor linking or other technical issues. To make sure that search engines can efficiently crawl and index your website, you should keep an eye on the number of pages in your sitemap.xml and the number of pages we crawled.
