Image report

The elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition. `img`

No textual alternative available, not linked

The following images are not links and have no textual alternative available (no attribute), and are, therefore, not accessible to people who cannot see the images or understand the symbols in them. `alt`

An image belongs here if the image is significant (non-decorative) and the markup generator doesn't have knowledge on what the image is about available. For example, a photo gallery generator does not have textual alternatives available when the user refuses to provide them.

Purely decorative images should have the empty string as the textual alternative (), so it is a mistake for those to appear here. Also, when the markup writer knows what the images are about, (s)he should write textual alternatives. `alt=""`

Image	Location
	[From line 799, column 5; to line 799, column 83](#)
	[From line 824, column 5; to line 824, column 79](#)
	[From line 844, column 5; to line 844, column 75](#)

Empty textual alternative—Omitted from non-graphical presentation

The following images are marked to be omitted from non-graphical presentations (). `alt=""`

Purely decorative images belong in this category. Also, iconic images that are redundant with text next to them belong here.

If the page would become less understandable if the presence of an image was concealed, the image doesn't belong here. In that case, a textual alternative should be supplied or if the markup generator does not have a textual alternative available (because the user refused to provide it), the attribute should be omitted by the markup generator. `alt`
